Kazu Wada

▶ Studied art

▶ 1992 Started making ceramics.

Everyday pots, inspired by the dining table

Wada san believes that the dining table is the center of the home. Her goal is to make work that is easy to use, with the housewife in mind. Functional, practical work from a woman's perspective.

"I welcome complaints and criticisms, they are an opportunity to help me to grow.", says Wada san. She believes Karatsu ware is functional, not decorative, and wants people to discover the beauty and functionality of Karatsu for themselves. She looks forward with anticipation at a new generation of potters making everyday pots for the dining table.
